

Amendments to the Specification:

Please replace paragraph [0026] with the following amended paragraph.

[0026] In the present illustrative embodiment, the notch **34c** receives a cooperating protuberance **44c** in bearing plate **44** and this ~~join~~ joint is maintained as handle **30** is moved from one position to another. Thus, as a result of this join-slides joint, bearing plate **44** is slid down as the handle **30**, and cam **34**, are rotated to the second position ~~shows~~ shown in **FIG. 2B**.
